

Creating Your AudioPort Manager's Account

After your station's umbrella AudioPort account has been created, Pacifica Network will create the local AudioPort Manager's account. The local AudioPort manager will in turn be responsible for creating all other individual accounts.

As the local AudioPort manager, when we set up your account you will receive an email from AudioPort with a link to login.

If you don't see the email for setting up your account, check your spam folders etc. Sometimes firewalls prevent our messages. If you can't find the email anywhere, contact ursula@pacifica.org.

Follow the link to set up your own password. Pacifica Network staff will not have access to your password. If you forget it, there is a link for creating a new one on the AudioPort login page.
